

IPA Sprit 70%

PRODUCT TYPE	Disinfectant
APPLICATION	IPA SPRIT 70% is a disinfectant based on alcohol for application in the food industry and the health sector. Approved for disinfection without subsequent rinsing by the Danish Veterinary and Food Administration.
PROPERTIES	<p>IPA SPRIT 70% evaporates quickly which makes it especially well suited for wiping of surfaces, machines and equipment which are in contact with food. Used in connection with for example product code change and disinfection after ATP measurement.</p> <p>In order to reduce risk of infection, disinfection with IPA Sprit 70% on surfaces in general is recommended, e.g. door handles, tables, instruments and sanitary rooms.</p> <p>IPA SPRIT 70% does not evaporate as quickly as pure alcohol (93%), whereby a longer contact time is achieved.</p> <p>Comes as a liquid for application with a cloth as well as impregnated blue wipes (20x20 cm approved for contact with food).</p>
STORAGE	<p>Keep in tightly closed original container in a well ventilated place. Keep the product away from sources of ignition.</p> <p>Follow rules for flammable liquids.</p> <p style="text-align: right;">-15-20 °C</p>
APPROVAL	The disinfectant is approved by the Danish Veterinary and Food Administration under file number: 2009-20-5409-00107.
SAFETY	Please refer to the label and safety data sheet for information on safe use, handling and transport of the product.

INSTRUCTIONS AND DOSAGE

IPA SPRIT 70% is used undiluted.

Carry out the disinfection when the cleaning procedure has been completed.

In order to ensure proper disinfection, it is important to make sure that the entire surface is covered in IPA SPRIT 70%.

IPA SPRIT 70% must be evaporated completely from the disinfected surface before it is in contact with food again.

PRODUCTDATA

Colour	Colourless.
Physical state	Liquid/Wipes.
	0,8 Kg

Wipes packaging:

Canister:
150 wipes per canister (6 canister / carton)

Flowpack: 90 wipes per pk. (15 pk. / carton)
