

IPA Sprit 70%

Use biocides safely. Always read the label and product information before use.

PRODUCT TYPE	Disinfectant
APPLICATION	IPA SPRIT 70% is an alcohol-based disinfectant for use in the food industry and the healthcare sector. Approved by the Danish Veterinary and Food Administration for disinfection without subsequent rinsing.
PROPERTIES	<p>IPA SPRIT 70% evaporates quickly, which makes it especially suitable for wiping surfaces, machines and remedies that come into contact with food. Used e.g. in case of item code change and disinfection after ATP measurement.</p> <p>To reduce the risk of infection, spraying with IPA Sprit 70% on surfaces in general, e.g. door handles, tables and sanitary ware.</p> <p>IPA SPIRIT 70% does not evaporate as fast as pure alcohol (93%), resulting in a longer contact time. Can be used as a liquid for application e.g. with a cloth for surfaces.</p> <p>Biocidal effect: Bactericidal, yeasticidal and fungicidal.</p>
STORAGE	<p>Keep in tightly closed original container in a well ventilated place. Keep the product away from sources of ignition.</p> <p>Follow rules for flammable liquids.</p> <p>Storage: -15 - 20 °C.</p> <p>Durability: 36 months.</p>
APPROVAL	The disinfectant is approved by the Danish Veterinary and Food Administration under file number: 2009-20-5409-00107. For professional users only.
SAFETY	Please refer to the label and safety data sheet for information on safe use, handling and transport of the product.
ENVIRONMENTAL	The product is water soluble and may spread in water systems.
DISPOSAL	<p>Do not empty into drains; dispose of this material and its container at hazardous or special waste collection point. Dispose of waste and residues in accordance with local authority requirements. The packaging must not be recycled.</p> <p>Jerrican 1L, 20L</p>

INSTRUCTIONS AND DOSAGE

IPA SPRIT 70% is used undiluted.

Disinfection is carried out in a separate work process after cleaning.

It is important that the entire surface is wetted by IPA SPRIT 70% to ensure proper disinfection. For optimal effect, at least 1 minute of wetting of surface or equipment is recommended.

IPA Alcohol 70% must be completely evaporated from the surface being disinfected before the surface comes into contact with food again.

Contact your Novadan Consultant for further instructions on instructions for use.
